

## Clara - Helping people understand recycling

### What was your goal and what did you achieve?

In this project I wanted to spread awareness about the issue and how people can make a difference.

I worked with people to get their opinions on recycling, and the same thing was said - not many people know what they can do to make a difference.

I worked with friends at school and also teachers. They helped me put the posters around the school, and if people looked at them it explained what was happening, and explained the importance of it.

### Next steps?

The posters are still there and in the future I hope to make different posters about different issues, so that people can continue to learn about them.

### What did you enjoy most?

I've enjoyed meeting new people for this project, and understanding people who have the same views.

### Your advice to other students?

Stick with your first idea and don't put too much pressure on yourself.

*This case study was transcribed from an interview. These are Clara's words and opinions.*
